

- **U251 cells**

Human U251 cells were isolated from a human malignant multiforme glioblastoma.

- **Tumour growth *in vivo***

The cells were collected from a tissue culture flask and injected subcutaneously in the right flank of SCID/CB17 mice. The resulting tumours were monitored by measuring two diameters with calipers, and extrapolating the volume to a sphere.

The mice bearing U251 tumours can be treated by intra-peritoneal, intra-venous, intra-tumoral or subcutaneous injection of the compounds. Per os administration is also possible.

**Figure 1:** Tumour growth curve of the U251 cells as subcutaneous tumors Mean  $\pm$  SEM (n=5; take rate 100%)
